Heracleum III Linear

BERTJAN POT | POWERED THROUGH ELECTROSANDWICH® BY MARCEL WANDERS

Don't confuse the new Heracleum III Linear with its Endless sibling. Look closely and you'll see blossoms gently sweeping upwards at either side, making the Heracleum III Linear perfect to hang above long surfaces, like your dining table or kitchen island. Like the other designs in the Heracleum family, the lean branches are powered by Electrosandwich, by Marcel Wanders studio. The Heracleum III Linear, available in four colours, is inspired by the flowering plant of the same name. Its bloom frozen in time. This most recent design in the Heracleum family is compatible with our Wireless Wall Switch and contains bright LEDs; together they offer a higher light output that creates a warm glow.

Detailing

The Heracleum III Linear is a design not possible with normal wires. It's powered by Electrosandwich, a technique of coating conductive layers.

DIMMING & LIGHTING CONTROL

DALI dt6, Push / Pulse dim on Line Voltage, Wireless Wall Switch, Mains / ELV dimming is not possible, 0-10V

See last page for more information about the dimming possibilities.

Dimming & Lighting Control

DALI dt6

The luminaire is dimmable by integrating it into a DALI network. This is an universal and professional standard in home automation systems with endless control possibilities and ease. We advise to hire a professional to integrate the luminaire into your DALI network.

Compatible models: Linear CCC, Linear CE, Linear UL

Push / Pulse dim on Line Voltage

The luminaire is dimmable by using an external momentary switch or pushbutton switch. The switch is usually mounted on an existing wall socket. In some cases a Phase or Control wire needs to be added to your home's wiring. The switch should be suitable for use with line voltage and of the type 'normal off - momentary on'. The luminaire dims perfectly when the switch makes and holds contact. A short press switches between on and off.

Compatible models: Linear CCC, Linear CE, Linear UL

Wireless Wall Switch

With our Wireless Wall Switch, you'll have full control over your Moooi lighting design with one touch. Our Wireless Wall Switch comprises two components, a wall switch and radio device to put in the canopy of your Moooi lighting design. The wall switch can be integrated in System 55 or Decora style wall switches. The Wireless Wall Switch communicates via Bluetooth with the radio device in the luminaires canopy. Within moments you can enjoy full and fluent dimming, all the way to dark.

Compatible models: Linear CCC, Linear CE, Linear UL

Mains / ELV dimming is not possible

Mains and/or ELV dimming is not possible. The wireless wall switch is advised for dimming in this case.

Compatible models: Linear CE, Linear UL

0-10V

The luminaire is dimmable by using an either internally mounted or externally placed 0-10V dimmer switch. 0-10V is a dimming system widely used in some parts of the world, for example in North-America. This method will need its own wiring. Dimming quality is perfect, without flicker, the range can be limited and the luminaire can be dimmed to off.
