## *Dimming & Lighting Control*

### *Mains, Trailing edge, Reverse phase*

Control the mood with ease. This light fixture can be dimmed using an external Electronic Low Voltage dimmer. Simply connect it to an existing outlet—no need to rewire your home. Choose a dimmer designed for LED lights, suitable for 5 watts or lower, and supporting a C-type (capacitive load). This ensures compatibility and smooth operation. As with all delicate lighting, the experience of dimming may occasionally bring a flicker, hum, or soft buzz.

Compatible models: 11 CE, 11 UL, 7 CE, 7 UL
