

ARA FLOOR

Ilaria Marelli

Ara was inspired by architectural light cuts, while featuring a rotating body that allows light to be modulated and redirected. The DIM TO WARM technology allows to modify the light's colour temperature, switching smoothly from vivid white to soft warm, replicating the same effect as an old incandescent bulb.

LED DTW

LAMPING

Source	LED board + linear LED
Total power	23+45W
Emission	diffused emission
Switching	double switch, dim to warm on board
Tension	230V
Color temperature	from 2200K to 3000K
Luminous flux	2390lm + 3426lm
Typ CRI	85
IP class	20
Materials	aluminium + PMMA
Notes	Orientable diffuser, color temperature from 2200K (at min.) to 3000K (at max.) Also available in 120V. Anthracite RAL7016, champagne RAL9007. Cable length 2.7m
