

# LAMPE CABANON

*Le Corbusier*

In 1952, on the shores of the French Riviera, Le Corbusier built “Cabanon”: the absolute archetype of essential living. The project, executed according to the rules of the Modulor, is found just a stone’s throw away from the sea and served as a refuge for the architect in his final years. Lampe Cabanon, named after the inspired microcosm, represents a symbol of architecture, design, production, and essential living. The lampshade, made from sandpaper that the architect used, was crafted from a wartime artifact – a mortar shell carrier – found on French beaches. The lamp, for which numerous sketches and designs exist, represents a moment of rebirth in the post-war world.

## LAMPING

Source	E27 A60
Total power	60W
Tension	230V
Color temperature	according to bulb
IP class	IP20
Notes	Cable length 2,5m, dimmable on cable, according to bulb

## Codes

CAB ENW 11

## Structure

Black zinc/green painted tracing paper sheet

## Certificazioni

**UK  
CA**
